OBJECTIVE

2nd Year Computer Science undergrad seeking a challenging and rewarding internship opportunity as a Computer Science undergraduate student, where I can leverage my strong academic foundation, programming skills, and passion for technology to make a meaningful impact. With a keen interest in software development and a drive to learn and grow, my objective is to gain practical experience in a professional setting, work alongside experienced professionals, and contribute to innovative projects. I aim to deepen my understanding of industry best practices, enhance my problem-solving abilities, and refine my technical skills, while actively contributing to the success of the organization.

SKILLS

Soft Skills
- Strong problem-solving
- Analytical skills
- Interpersonal Skills
- Communication
- Critical thinking
- Collaboration

Web Development
- Html , Css , JavaScript , Node , Express , MongoDB

App Development
- Flutter , Dart , Firebase, Rest Api

Programming Language
- C , C++ , Java , Dart

UnderGraduate Courses
- DSA ,OOPS , OS , DBMS, Networking, AI, Computer Architecture

PROJECT

Web development Projects (FullStack(Html , Css , JavaScript , Node , Express , MongoDB))

Locally

Its a Web based Application where seller can register their services like plumber, electrician or rikshaw driver with time available and money they need for the work and consumer can opt for the services and provide rating and review for the services also has a Admin interface to control sellers and consumers. It is collage project developed by me and my friend. **(See the project here)**

Amanfood

Its a Css UI project with all design and animation for a hypothetical food startup **(See the project here)**

App development Projects(Flutter, Dart, FireBase, Rest Api)

Talke

Its a Flutter based Mobile app integrated with firebase and user authentication and login , signup .Its a group chat with Profile photo username and messages **(See the project here)**

Places

Its a Flutter based Mobile app where a User can save a place with a Title , a picture and the location of the place either my selecting your current location or selecting the location on the map. the place you save will appear on your dashboard with complete address of the place you can tap to open and see the image and location of the place and also as it is api of google map when You open the map and select the pin and open on google map you can also navigate to there through google map.this app saves data locally on your device **(See the project here)**

Rest other projects based on web development app development and other fields can be viewed on Github . (click here)

EDUCATION

Bachelor of Technology Computer Science and Engineering

Indian Institute of Information Technology ,Sri City (IIIT) 2021-2025

CARRICULAR ACTIVITIES

Certification available on Linkdin profile (Click here)

Qualified Jee Mains (96 percentile) And Advance

Qualified NTSE Stage 1 (Rank 9 in state)

Qualified PRMO

Completed HactoberFest

Completed Google cloud computing Paths

EXTRA-CARRICULAR ACTIVITIES

Won many trophies in different events in my School (Comprising of Skit, Dance, Sports, Singing etc)

Played State tournaments in Football . Was a part of my School Team and Currently College team

I also like Writing Articles , Poetry
